SUMMARY

Game Development graduate with hands-on experience building gameplay systems, user interfaces, puzzle levels, and mobile web game prototypes. Proficient in Unreal Engine 5 Blueprints, C++, C#, JavaScript, HTML, and CSS, with experience taking features from concept through implementation, testing, and presentation.

WORK EXPERIENCE

Web Develop Intern | [Svervigabit](#)

Jul 2023 - Oct 2023

- Managed and maintained web hosting servers for clients
- Designed and developed client websites using WordPress, including frontend layout customization and backend data management
- Assisted clients in updating website content and ensuring site performance and functionality

Game Development Intern | [Cryorbis Studio](#)

July 2025 - Oct 2025

- Designed and implemented UI systems to enhance user experience and game flow.
- Created and balanced puzzle level designs, ensuring engaging gameplay.
- Developed and tested game systems using Unreal Engine 5 Blueprints.
- Improved performance and usability through feedback and iteration.
- Wrote game design and technical documentation for development reference.
- Assisted in showcasing the company's demo project at Level-Up KL 2025 event.

UI/UX Designer (Web Game Development) | [My Lucky Mall](#)

Apr 2026 - Present

- Independently designed and developed two mobile-first web game prototypes - a spin-the-wheel game and a tile-matching puzzle game - using HTML, CSS, and JavaScript.
 - Implemented scoring, level progression, restart logic, sound effects, responsive mobile interfaces, and functional testing; presented playable prototypes to management.
 - Produced AI-assisted promotional videos, banners, event materials, and in-app graphics using ChatGPT, Seedance, CapCut, and image-generation tools.
 - Managed in-app visual updates and maintained approximately 50 product listings across Shopee, Lazada, TikTok shop and the company e-commerce backend.
-

EDUCATION

Bachelor of Computer Science

2023 - 2025

Multimedia University (MMU)

- Specialization in Game Development.
- CGPA 3.46

Diploma in Information Technology

2021 - 2023

Multimedia University (MMU)

- CGPA 3.5

ADDITIONAL INFORMATION

- **Game Development:** Unreal Engine 5, Blueprint Visual Scripting, GDevelop, Gameplay Systems, Puzzle Level Design, Gameplay Testing
 - **Programming:** C++, C#, C, JavaScript, HTML, CSS, Java, PHP
 - **Web Development:** React.js, WordPress, Responsive Web Design, Mobile Web Development
 - **Design and Content Tools:** Adobe Photoshop, Adobe Lightroom, CapCut, ChatGPT, Seedance
 - **Additional Experience:** AI-Assisted Content Production, App Content Management, E-commerce Platform Management
-

PROJECT DONE

2023 - 2025

- **Be Brave**
 - Subject "Game Design" Project
 - A simple jump-up platform game.
 - Using GDevelop 5 to develop it.
- **A Fantastical 3D Universe Beyond the Stars**
 - Subject "Computer Graphics Fundamentals" Project
 - A simple 3D World.
 - Programming language : OpenGL, C++
- **ClawMachine**
 - Subject "Game Physics" Project
 - A simple 2D grabbing item game that include physics
 - Develop using UE 5
- **Dungeon Escape Game**
 - Subject "Game Algorithms" Project
 - A simple 2D escape game
 - Enemy include simple Algorithms
 - Programming language : C#, Monogame
- **Repeat System Action Game (Final Year Project)**
 - An action-based game focused on repeating player actions as a core mechanic
 - Players can record and replay actions to solve combat and puzzle challenges
 - Emphasizes player learning through iteration and system feedback
 - Developed using Unreal Engine 5
 - Implemented using Blueprint visual scripting
